

TouchPoint™

Elevate the Homebuilder and Vendor Experience

Streamline jobs, payments, orders, and schedules between homebuilders and their contractors, trades, and suppliers.

Real-Time Sharing & Communication with Vendors

Save Time & Reduce Errors

Avoid complications and back-and-forth. Orders, schedules, documents, and payments are automatically shared with vendors through a single access-point.

Works with NEWSTAR and NX:

TouchPoint runs on the project data already in your ERP. Your team and your vendors work from the same view.

Encourages High Vendor Adoption

Vendors can view complete required information from any Constellation builder they work with from a single login.

Effortless Administration

After you invite vendors with a single click, vendors can manage their own credentials while receiving training and support directly from Constellation - leaving no burden to you.

Unlock Vendor Efficiency

All your builder information in a single portal

- » Manage all jobs and construction schedules for any Constellation builder.
- » Submit, view, and track all invoices while reconciling payments against invoices and purchase orders.
- » Access real-time info on POs, tasks, service orders, and documents.
- » Give field teams job site access to tasks, schedules, and purchase orders with the TouchPoint Field app.
- » Access reliable, professional technical support from Constellation HomeBuilder Systems.

End-to-End Vendor Collaboration

» Scheduling & Project Management

- Preview real-time task information.
- Manage schedules and tasks in list or calendar view.
- View and filter by project, lot, date, and more.

» Purchasing

- View POs, invoices, and change order details.
- Track payments and reconcile invoices.
- Submit, manage, and view invoices.

» Service Orders

- View and track service requests and orders through to completion.

» Documents

- Access a centralized library of project, lot, and model-specific information.
- Includes location maps, purchase orders, and more.

» Multibuilder

- Vendors can view and filter information seamlessly all Constellation homebuilders.

» Builder-Vendor Communication

- Real-time communication of up-to-date project and task information.

» Administrative Controls

- Manage and update company information.
- Admins can create new users and assign permissions.
- Users can self-serve password resets.

» Bid Management

- Integration with BidManager.
- Efficiently collaborate on projects and bid packages.

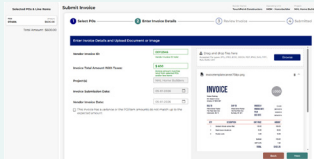

» Mobile Access

- Field teams get on-site access to tasks, schedules, purchase orders, and job documents - from any iOS or Android device.

“Before TouchPoint, our trades relied almost entirely on manual communication from us. Today, they log in, find what they need, and even catch issues before we do. That shift has fundamentally changed how we work with our vendors.”

— Eric Wilman, Production Manager, Veridian Homes

✓ Invoice Submission

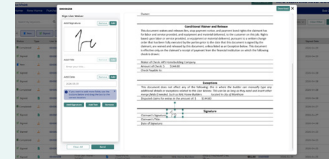

- Vendors submit invoices in TouchPoint, validated against POs and line items.
- Invoices and attachments flow into your ERP automatically.

Invoice & Lien Waiver Suite

Less paperwork. Clear visibility. Faster payment workflows.

✓ Lien Waiver Automation

- Builders initiate lien waivers, vendors sign digitally.
- Signed waivers tie back to the related payment in your ERP.
